

Identify the internal antenna polarization of EZStation5

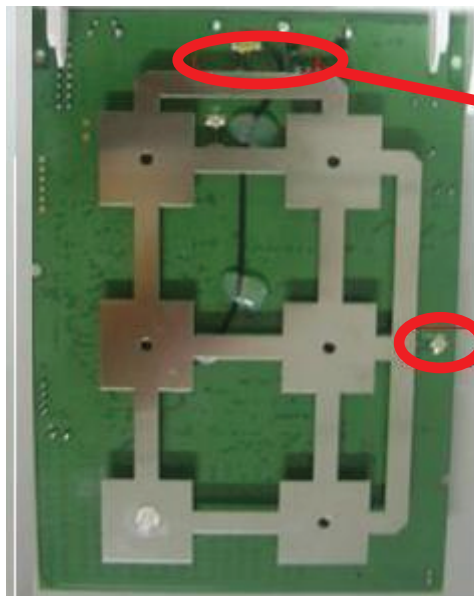

1. When you open EZStation5, you will see the PCB as below.

2. There are three U.FL connectors on the PCB, two of which are connected to the antenna. One is on the top of the PCB, while the other is on the middle of the PCB. (See area with red circle)

3. Please refer to the illustration below to identify the antenna polarization

Vertical Polarization
Connected to Aux port of MiniPCI card

Horizontal Polarization
Connected if horizontal polarization is used.
